A fashion designer! That's all Sophie Palmer has ever wanted to be! So, when an Academy Award-winning designer calls to offer her a job, she drop-kicks her life in New York, and her fiancé, to the curb. Sophie's new life takes her to LA and puts her in her supermodel sister's line of fire. She gets an assistant who may be challenged but who teaches Sophie a thing or two. And her love life? Well, who else can wander into a bar for a drink after work and meet Finn McLaine, computer genius millionaire? Only Sophie! Everything is going well until it appears that someone is trying to harm Finn. After several suspicious "accidents," Sophie confronts him to find out what he's working on that's put him in danger. If Finn wants to marry Sophie, he's gonna have to stay alive to make good on that proposal. Then Sophie can stitch together all the dangling threads of her life and become who she's meant to be—Sophie by Design.
