The Armstrong and Miller Book is the brilliantly funny book from Armstrong (and, indeed, Miller). This hilarious compendium of entirely original material is packed with favorites such as the street-talking World War II pilots (starring in their very own comic strip), musical maestros Brabbins & Fyffe, and accident-prone historian Dennis Lincoln-Park. There are also some fantastic, brand-new characters to discover, including Pharius and Horschstadt, the woefully out-of-touch vampires, and Phil and Ken, the self-made men. The result is an endly rewarding treasure chest of jokes and comic set pieces—as smart, stylish, and impossibly filthy as the authors themselves.
