If you screw up in life enough, your past won't just catch up to you. It'll hunt you down, tooth and claws bared and going for the jugular. This is what Peyton Price discovered, when his infamous reputation as a bounty hunter of the fey comes back to bite him, literally. Only, they don't want him dead, like he figured. They want him to work for them.

It's not an option, and with the magic binding him, there seems to be no escape from it. But they don't know Peyton. He'll pull every string, no matter how slimy or tricky it may be, to get himself out of this mess.

The game isn't over yet.
