In the near future, financial collapse of the United States results in nationwide anarchy. Like dominos, the rest of the world follows the US into oblivion. Nuclear war followed by a viral pandemic decimates the globe, reducing the population to mere thousands. In America, a group of survivors led by former SPECOPS Captain Wade Coltrane fight to survive and to regenerate society while protecting humanity from the greed of a faux king and a dysfunctional clan of sociopathic killers led by beautiful Russian psychopath, Nina Lutrova.

Will Project Terminus enable the development of a new nation or will greed and evil ultimately end civilization?
