He's very handsome, wealthy, and hotter than hot... and he's not mine. Carla's childhood friend, Thera, is visiting Greece after ten years and she is bringing her new boyfriend with her. He is none other than breakout young programmer Jake Winters. Jake turns out to be as Thera claimed him to be – very handsome, wealthy, and hot. He has all the qualities women wish for a perfect boyfriend. But there is just one catch – Jake Winters also turns out to be Tom Sawyer. Tom Sawyer is the pseudonym he used when he was working as a male escort two years ago, when Carla first “met” him. It did not take long for both of them to find out that the passion that drove them that blissful whole week in a romantic island in Greece drives them still. How can she tell Thera that she is in a relationship with a very dishonest man without confessing her part in the betrayal? And what about the emptiness she's begun feeling since their first encounter and eventual parting? She might be in love with him, but she has no choice but to give him up before she also betrays herself.
