Kylie Quinn is positive nothing could be more embarrassing on her first day of college than having her unmentionables go sprawling across campus. She was wrong. Very wrong.

Having a super-sexy co-ed twirl them around his finger like he's privy to all of Victoria's Secrets is so much worse.

Xander Collins has met his match with Kylie—she's gorgeous, smart, sarcastic as hell, and doesn't give a damn that he's loaded. She's also a virgin. And he doesn't do virgins. Been there, done that, and he's still paying for it. But that doesn't mean they can't be friends, despite the fact her flirty moves leave him with balls a shade of blue he never knew existed. Kylie is special, and she deserves more than his typical "one and done" routine. But as his life implodes and his not-so-brilliant plan to take things slow blows up in his face, he's at risk of losing everything—including Kylie. Now he must decide if everything he's been fighting so hard for is worth it without her by his side.
