What is real, what is not? What can be seen, what can not? Who is a Spy? Who Is Not? This is the true story of just such a spy, an, American, and gay. This is a very odd story, one that many will not believe, many will question and others will outright dismiss it. Frankly, I don't care. This book was not written for anyone but the person who lived this unquestionably remarkable life. Justification, truth, its all here. Many will not want to hear it, others will not want to read it. The response is simple: then don't. Justification is not needed. The events in this book are real, they happened.

Many of the places, names of people, and events have been altered to protect the living, the nation, and the author. This is the story of Morris, the Gay American Spy who has seen it all, been a part of the spy world since 1975 and lived this remarkable life which had an impact on the United States and in some cases, the world. Here is that life. Sometimes harsh, sometimes unbelievable, but it happened, all the events are true and were lived, lives were lost and the world around us changed even if few noticed.
