The Wind Riders have escaped the treacherous Lobishr Prison, but only after paying the ultimate cost – the life of one of their own. Betrayed from within, and with an entire city after them, the surviving Wind Riders must navigate not only the hostile streets of Tyr, but their own tenuous relationships. New friends join them – a deadly Montsernan, a former Cleric, and a mysterious Trohman woman – along with old, just in time to flee the city and begin the long trek back to the Lore Mountains.

But a Tyran army has already begun its march south, along with the massive new Tyran airship, both intent on destroying the unsuspecting Wind Riders in their very home. To avoid a slaughter, Galen, Iago and their new allies must race across the steppes and navigate the perilous Lore Mountains. Bandit-kings and guards prove to be the least of their problems, for how can you survive when you trust no one, not even yourself?
