Tribute is a book that is a compilation of writings from a man, Ted, who was beset by many trials and tribulations in his life, but persevered and never gave up. It was written by his wife of over forty years. It was written as a testimonial to him, but also as an inspiration to others who may not fit society's description of "perfect" physically or mentally to look inside themselves and see what gifts they have that they can share with the world. Finally, hopefully, this work will help bring about changes of what we expect of others who look or act differently than us. They, too, have a gift to share, if given the opportunity.
